

Add Sidebar Menus

To add a standard sidebar menu, add `standard_portal_menu_items`:

```
standard_portal_menu_items = [
    {"title": "Projects", "route": "/project", "reference_doctype": "Project", "role": "Customer"},
    {
        "title": "Request for Quotations",
        "route": "/rfq",
        "reference_doctype": "Request for Quotation",
        "role": "Supplier",
    },
],
```

To apply the changes, run `bench migrate`. Then, if you go to `Portal Settings` on the Desk, you should see that now your sidebar menu has been added as a standard portal menu item:

Standard Sidebar Menu

☐ Hide Standard Menu

Portal Menu

<input type="checkbox"/>	No.	Title *	Enabled	Route *	Reference Document Type	Role
<input type="checkbox"/>	1	Projects	<input checked="" type="checkbox"/>	/project	Project	Customer
<input type="checkbox"/>	2	Request for Quotations	<input checked="" type="checkbox"/>	/rfq	Request for Quotation	Supplier
<input type="checkbox"/>	3	Supplier Quotation	<input checked="" type="checkbox"/>	/supplier-quotations	Supplier Quotation	Supplier
<input type="checkbox"/>	4	Purchase Orders	<input checked="" type="checkbox"/>	/purchase-orders	Purchase Order	Supplier
<input type="checkbox"/>	5	Purchase Invoices	<input checked="" type="checkbox"/>	/purchase-invoices	Purchase Invoice	Supplier
<input type="checkbox"/>	6	Quotations	<input checked="" type="checkbox"/>	/quotations	Quotation	Customer
<input type="checkbox"/>	7	Orders	<input checked="" type="checkbox"/>	/orders	Sales Order	Customer

There is also an option to add a `Custom Sidebar Menu` which is possible through the Desk. **Custom ones will be attached with the site database, unlike Standard ones that is attached with the custom app.**

Custom Sidebar Menu

Custom Menu Items

<input type="checkbox"/>	No.	Title *	Enabled	Route *	Reference Document Type	Role	
--------------------------	-----	---------	---------	---------	-------------------------	------	--

No Data

Add Row

Sidebar menus will be visible according to the roles & permissions set for users. So, a user is not guaranteed to be able to view certain sidebar menus based on the roles & permissions they are given.
