# What is Frappe Framework?

Framework to build database driven apps, it also powers ERPNext.

### Meta-data Centric

Put a strong emphasis on meta-data to create db tables, form designs, and configs which is stored in a Model called DocType.

### Rich Admin Interface

Has a comprehensive interface called Desk that auto-generated multiple views such as Report Builder.

### Versatile

Supports tons of features, including roles/permissions, realtime events, background jobs, and emails.
